

# PREMIS® Fungicide snow mould technology sheet

Victoria Park East Golf Club, Guelph, ON (April 2011)

## Why choosing PREMIS makes sense:

PREMIS combines excellent value with consistent, superintendent-proven control of grey and pink snow mould on fairways, even compared to quintozeine.

## PREMIS:

- Cost effective
- Proven performance
- Easy to use
- Rapidly rainfast
- Low AI load

## Performance

## How PREMIS works

PREMIS 200F is a systemic fungicide that is absorbed by the leaves and controls snow mould by interfering with the sterol and cell membrane biosynthesis.

## How to apply PREMIS

Apply PREMIS once in late fall or early winter prior to snow fall. For control of pink and grey snow mould, apply PREMIS at 32 mL/100 m<sup>2</sup>, in 6-8 L of water/100m<sup>2</sup>.

## Technical Information

**Fungicide Group:** 3

**Active Ingredient:** Triticonazole

**Rainfast:** 1 hour

**Formulation:** Suspension

**Packaging:** 2 x 3.2 L

## PREMIS Fungicide for Snow Mould Control customer experiences

*My fairways are a mixture of Kentucky bluegrass, annual bluegrass and some native bent grass. Historically, I do not treat my fairways, but we've experienced increasing snow mould damage the past few winters. Last fall, we decided to treat the fairways that have the longest snow cover. I didn't want to go through another spring of slow-recovering, damaged turf.*

*I treated the front nine with PREMIS and was very happy with the snow mould protection. The PREMIS-treated fairways had less than 1% snow mould damage and began the spring healthy. My untreated areas had snow mould damage. I'll be using PREMIS at 32 mL for snow mould protection this fall.*

Bill Thornton, Superintendent, Wildwood Golf & RV Resort (McGregor, ON)

*Over the past several years, I have been using quintozene for snow mould. In both the wettable powder and flowable products I have achieved good control of snow mould. With the subsequent ban of all quintozene products, I decided to do a side by side trial of PREMIS vs quintozene on my 8<sup>th</sup> fairway. The results from both products were fantastic and comparable. I liked the packaging and ease of use PREMIS provided. PREMIS also gave me an option for good snow mould control on fairways at a fair price moving forward.*

David DeCorso, Owner / Superintendent, Victoria Park East Golf Club (Guelph, ON)
