

Vision Pro HD Turf Colourant

technology sheet

Vision Pro HD turf colourant represents the next generation of Green Lawn® brand turf colourants defined for use in golf course applications.

- Intended to complement the highest performance expectations of spray applications by golf course superintendents and turf professionals, Vision Pro HD can be used alone or in combination with plant health and conventional plant protection programs.
- Unlike other products that leave behind a less appealing blue tone colour, Vision Pro HD remains consistently green for the duration of the application period. The result is the most natural appearance of turf colour.
- The technology of Vision Pro HD means no adverse effects or breakdown associated with UV light, no plant phytotoxicity and easy clean-up of spray equipment. Vision Pro HD may be applied with professional spray application equipment using the existing seals – no seal changes are required.
- Add Vision Pro HD to all your greens and tees spray programs and let the pride in your turf quality show for itself.

Formulation

Liquid

One case contains

4 x 3.78 L jugs

Storage

No special measures necessary if stored and handled correctly. Ensure thorough ventilation of stores and work areas. Keep away from heat. Protect from direct sunlight.

Directions for use

Shake well before use.

For optimal appearance, apply bi-weekly or as often as spray solution applications are made on the greens and tees.

For best results, use low to medium sprayer pressure. Avoid overspray on concrete, masonry or any other objects where colour is not desired, otherwise permanent staining may occur. Accidental overspray may be removed by a water rinse prior to drying.

Vision Pro HD

Turf Colourant

Application rates

One case of Vision Pro HD treats 6.3 to 12.6 ha (15.12 to 30.24 acres).

Turfgrass 1.2 to 2.4 L/ha (0.5 to 1 L/ac)

Flexibility in usage rate is reserved for the applicator to achieve the custom look desired.

Use Vision Pro HD alone or in spray mix combinations.

Mixing order

1. Ensure the spray tank is clean before use.
2. Fill the tank 1/2 to 2/3 full of water and start agitation.
3. Following the standard order of addition, add Vision Pro HD after dry flowable/dispersible granules and before water-soluble pesticide formulations to tank while agitating.
4. Allow Vision Pro HD to fully disperse and mix into the spray solution before adding additional pesticides.
5. Continue agitation while filling the remainder of the spray tank.
6. After use, clean the spray tank according to label precautions.

Apply pesticide solution mix to target site at rate specified by the pesticide manufacturer consistent with the product label.

ALWAYS FOLLOW THE PESTICIDE PRODUCT LABEL.

Equipment cleaning

After application, always drain and clean the sprayer tank, pump, hoses, valves and nozzles as instructed by the pesticide manufacturer's label.

- After initial rinsing, the use of a tank cleaner or tank cleaning agent will facilitate additional removal of pesticide residue from equipment.
 - Do not leave pesticide mix solutions with Vision Pro HD in the sprayer tank overnight.
 - Dispose of rinsates as per municipal, provincial, and federal regulations.
